Stoves and Fireplaces

New Season Brochure

JØTUL®

Jøtul is the longest running producer of wood stoves in the world boasting a 160 year long history. The adventure started in Loelva in 1853 where Oluf Onsum the son of a farmer, founded Kværner Jernstøberi. Kværner started the development of cast iron products, and leading up to 1900, the company was one of the largest wood stove foundries in Norway. Today Jøtul products can be found all over the world and are providing Australian families beautiful warmth season after season.

Jøtul F 100  **JØTUL**

Front

Side

From above

The F 100 is small in footprint but big in performance. The attractive pattern in the cast iron and up to 7kW peak output in thermal performance means that the stove makes its presence known in every room, both aesthetically and temperature-wise. Despite the small size of the stove, it has a big glass door that gives a good view of the fire.

COLOUR ● MATT BLACK

JØTUL Jøtul F 163

F 163 is characterised by its large side glasses and three sturdy legs that give the wood stove an easy and modern look, which makes it suitable for both corner and standard installations. Designed to suit modern living and powerful enough to heat 100-140m².

Jøtul F 305 LL
Jøtul F 305 B **JØTUL**

Jøtul F 305 series has a horizontal design that makes it easy to place logs and provides a rapid 10kW peak heat transfer to the room. Integrated convection has an impressive 1g/kg emission rate. With Norwegian designers Anderssen & Voll, we have made a stove which merges 160 years of heating experience with timeless design. Available with Long Legs (LL) or wood stacker base (B).

JØTUL Jøtul F 520

With panoramic view to the fire, the 13kW peak F 520 offers an experience of a live campfire in your living room. With its wide expanse of glass, flames can be fully enjoyed from three sides of the stove. An innovative special glass coating means the glass stays clean. The smart construction of the air valves makes the stove easy to light and is user friendly.

Jøtul F 3 

Front

Side

From above

Jøtul F3 CB has advanced clean burn technology for greater efficiency and an integral ash solution. It can also burn selected smokeless fuels without the need for an adaption kit. Adaptable with a short leg option, the Jøtul F3 makes an elegant focal point in any room, and gives a peak heat output up to 12kW.

COLOURS

 BLUE BLACK ENAMEL

 IVORY ENAMEL

Jøtul F3 TD is a medium sized stove that has a classic design, with a large glass door which gives a fantastic view of the flames.

*rear heat shield is optional if installing next to a non-combustible wall

*SE door available in all colours and Lattice door only available in matt black.

Jøtul F 8

Front

Side

From above

The Jøtul F 8 is one of Jøtul's oldest traditional stoves still going strong. Why have people warmed to this stove for generations? Perhaps it's the timeless, classic look, combined with an impressive peak heat output of 17kW.
