

INSPIRE FREESTANDING

700 | 900

REAL  FLAME

INSPIRE FREESTANDING

Built on the upgraded improvements and features of the Inspire MK2; we introduce the new freestanding model available as firebox only or with woodstacker. Operating on Natural gas and LPG, the new High Efficiency models are equipped with the versatile power balanced flue technology, enabling installation in a variety of applications. The freestanding range offer both a vertical and horizontal flue option direct from the unit, making it even easier and uncomplicated for installation of the fireplaces.

The Australian made range is available in 2 sizes - 700 and 900, with the heaters designed for efficient combustion with a 4.1 star rating and maximised performance by heating up to 75m² of your space dependant on the heater size. With the repositioning of the fan motor to the rear of the unit the Inspire range performs quieter. The updated slimmer trim provides a significantly larger viewing area of the fire.

Choose from driftwood or the all new snowgum media options. Found in the Victoria highlands the inspiration of the new Snowgum media is derived from natural elements capturing the red, white and brown colour tones from the actual snowgum tree.

KEY SELLING FEATURES

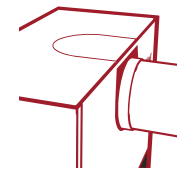

SIZE OPTIONS

Available in 2 different sizes 700, 900

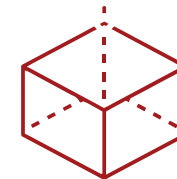

MEDIA FUEL SET

2 fuel bed options. Driftwood or Snow Gum
